

Turbonomic ACE Master Cloud Certification Agenda

The goal of this instructor-led, onsite training is to ensure that you feel comfortable using various cloud technologies. You will gain in-depth knowledge about these technologies and how Turbonomic can assure performance, minimize cost, and drive agility within them. This will ensure that your customers can get the most out of their investment in cloud and container technologies.

Day 1

Welcome/Introductions

Discuss expectations and the ACE Master Cloud certification program

AWS

Lab Exercises

Master AWS cloud technologies with a deep dive into setting up and managing cloud instances

Azure

Lab Exercises

Understand Azure cloud technologies with a deep dive into setting up and managing cloud instances

Turbonomic & the Public Cloud

Lab Exercises

Learn how Turbonomic can help with cloud visibility, adoption, control, and scalability

Day 2

Containers

Lab Exercises

Understand container opportunities and challenges, including Kubernetes and Cloud Foundry

Turbonomic & the Public Cloud

Lab Exercises

Learn how Turbonomic can help with cloud visibility, adoption, control, and scalability

Day 3

Certification Exams

Demonstrate your knowledge
